IRLP - Keeping the Radio in Amateur Radio

EMBEDDED IRLP

[Click here for](#) a complete, low power, IRLP solution!

[CLICK](#) for IRLP interactive node mapping

The aim of this project is to reliably and inexpensively link amateur radio systems without the use of RF links, leased lines, or satellites.

The IRLP uses Voice-Over-IP (VoIP) custom software and hardware. Coupled with the power of the Internet, IRLP will link your repeater site or simplex station to the world in a simple and cost effective way.

IRLP operates a worldwide network of dedicated servers and nodes offering very stable worldwide voice communications between hundreds of towns and cities. All this with unsurpassed uptimes and the full dynamic range of telephone quality audio.

IRLP - Keeping the Radio in Amateur Radio

The version 3.0 IRLP boards are available for order from IRLP. All boards come fully assembled and tested.

Interested in a completely built and tested low power solution?
Please see [Embedded IRLP Order page](#)

Each board comes complete with all the cables between the board and computer parallel port (with Sub-Hoods) and terminates in a MALE DB-9 connector for interface into the radio. You will require a FEMALE DB-9 to interface your radio/repeater/controller and TWO mono or stereo 1/8" audio jacks to connect to your sound card. The audio circuitry (*since it is specific to your hardware*) is your responsibility. [More details here.](#)

Total Cost Calculation Sheet

[US\\$ CA\\$ Price Adjustment Announcement.....](#)

Canadian Orders	Cost \$CDN	All Other Orders	Cost \$US
IRLP 3.0 Board Package	\$105	IRLP 3.0 Board Package	\$105
CentOS packaged for IRLP on CD	\$25	CentOS packaged for IRLP on CD	\$25
Shipping (to Canada)	\$15	Shipping (to USA)	\$18
Donation (<i>suggested avg. amount</i>) See footnote	\$40	Donation (<i>suggested avg. amount</i>) See footnote	\$40
Totals	CA\$185		US\$188
Buy Now in CDN funds Payments are handled by PayPal, but you do not require a PayPal account.		Buy Now in US funds Payments are handled by PayPal, but you do not require a PayPal account.	

IMPORTANT : If sent by mail, please include a printed copy of a completed order form with your payment. For PayPal orders, emailed a copy of the completed order form to sales@irlp.net.

ALSO IMPORTANT : Please do not ship your payment via courier or registered mail as we are seldom available for signing during normal business hours. Shipping by these means will just cause delays in delivery, and the order may be returned at your expense.

[COMPLETED SAMPLE ORDER](#)

Payment Information

The only accepted forms of payment are by **PayPal**, or **International money orders**. If you choose Money Order, please send an **International** Postal Money Order in US

Funds (available from most USPS outlets, **PINK in color**, NOT green). **I can not accept any money order which says "Negotiable only in the US and Possessions"**

If you are in **Canada**, please send a **Canada Post postal money order** in Canadian funds. Canadian personal cheques will be accepted, but will add a 10 day delay in delivery.

PayPal Payments

Either use the "Pay Now" buttons above or send PayPal payment to  sales@irlp.net Please email a completed order form as well, indicating payment has been made by PayPal.

Please make and cheques or money orders payable to

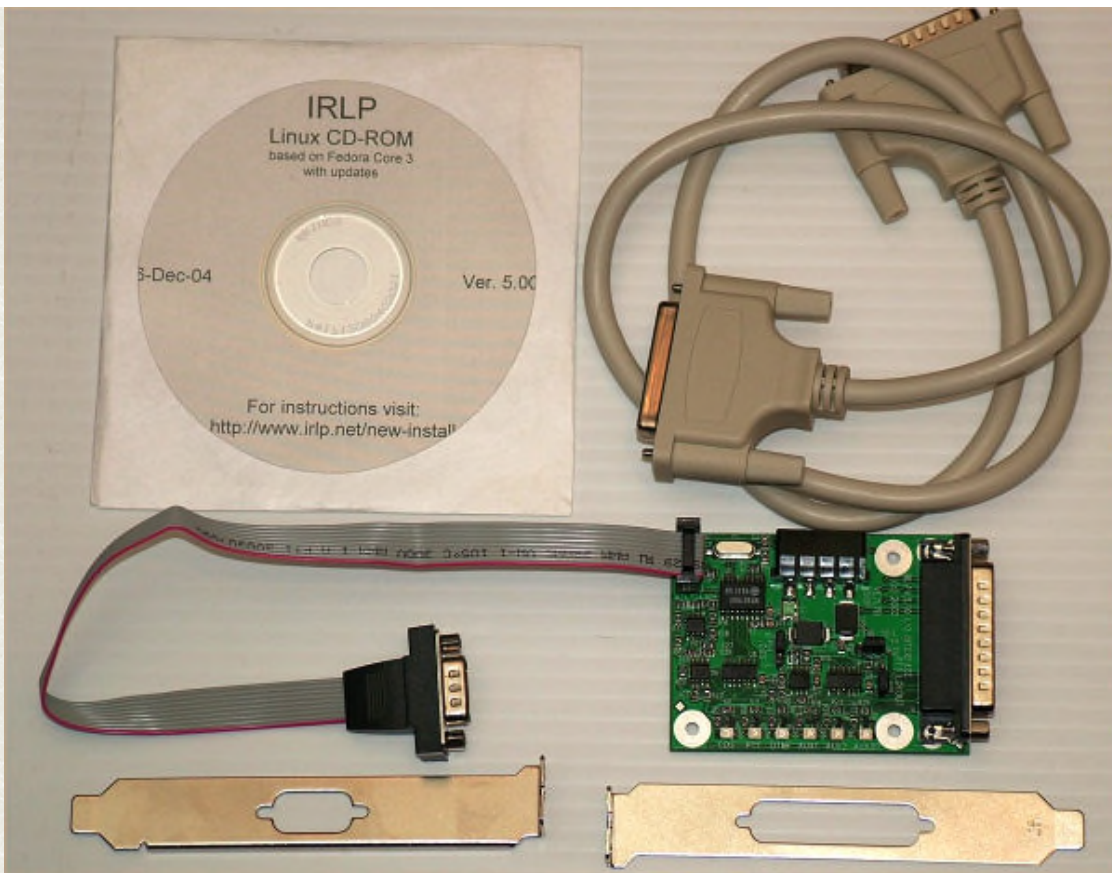

David Cameron 4708 Caulfeild Drive West Vancouver, B.C. Canada V7W 1G2	<i>DO NOT ship payment by courier expecting to expedite your order. Rarely is anyone home to accept during business hours. Use PayPal for quicker turnaround.</i>
--	---

NOTES:

1. Any brokerage fees, duties or local taxes that may apply in your country are your responsibility.
2. Multiple board orders may be subject to discounts. Please email sales@irlp.net for more details.
3. Shipping outside of North America may require additional shipping charges. Please email sales@irlp.net for more details.

The IRLP board package price includes:

- 1 version 3.0 IRLP board and cable
- page explaining where to obtain up-to-date setup instructions for CentOS.
- IRLP system software will be downloaded after Linux install.
- IRLP software support by volunteers in most time zones.

To assure you have the latest up-to-date code, the IRLP **system software** is not on the CD but rather it is downloaded and installed onto your machine using a script provided by IRLP.

IRLP now ships with CentOS, an open source project which mirrors Redhat EL. The IRLP CD is **NOT** a full CentOS CD. The version we provide is very small, only 150 megabyte CD, which installs to about 400 megs. If you already have Linux, we still suggest you obtain the IRLP CD for optimal performance. IRLP will not assist in the initial installation of any Linux release besides CentOS, although many others have been set up to work with IRLP.

Due to enhanced border security and the package bombardment with who knows what, the IRLP kit is no longer shipped with a bootdisk (*as shown above*). Bootdisk creation is covered in the install documents and requires a formatted 1.44MB 3.5" floppy disk.

Other Order Information

All packages are shipped by standard Air Post. Other methods (such as courier) can be arranged, but must be agreed upon before order.

The average turnaround between order and delivery is 2-3 weeks on average. The boards are all pre-built and shipped on an as needed basis.

Just as a side note, there will never be a per USER fee for using the IRLP system that will be charged by IRLP. You can, however, charge for the distribution of codes in your area, and also have full control over access to your node.

IRLP may, in the future, have to charge a yearly fee on a per NODE basis. This fee will not exceed \$30 US per year and will be used to pay for domain web space and contracted help we require to solve software problems.

Thank you.
David Cameron VE7LTD

IRLP Designer

Donations

The IRLP donation fees are used to help offset the cost of the many network services, telephone calls, software products, and computer hardware required to run the IRLP on a daily basis. Without your support, IRLP would not be able to troubleshoot problems and add features to IRLP.
